X32-4X3 Craft Notes #01

Basic Operations and Translations

The X32-4X3 SpaceCraft (otherwise known as an 'Alien Fighter') is a Fighter jet with space-faring capabilities. The X32-4X3 uses anti-matter fuel and a hitherto unknown engine to achieve thrust and maneuverability far higher than terrestrial aircraft.

The X32-4X3 is a very complex machine, whose interface utilises alien language that we mostly do not understand. Through experimentation with the aircraft, we have determined the meanings of many of the labels. As the ship was destroyed, it is unlikely that we will learn more anytime soon.

Command Interface

Controls of the X32-4X3 occurs via coded instructions typed into a keypad, after which a button labelled 'Confirm' must be pressed. The console also contains a number of switches and sliders, which may need to be set to specific values for an instruction to work.

Translations

Words translated thus far are combinations of 2-4 symbols. Understanding of the alien grammar has thus far eluded us.

 - Airlock

 - Altitude

 - Cancel

 - Confirm

 - Diplomacy

 - High

 - In Atmosphere

 - In Space

 - Landing

 - Launch

 - Low

 - Medium

 - Pressure

 - Re-Entry

 - Self-Destruct
