X32-4X3 Craft Notes #03

Landing Procedures

The X32-4X3 has an advanced autopilot, which can automatically handle re-entry and landing of the craft.

Unless there is an Landing Sequence Malfunction, the craft will automatically complete all landing sequences successfully. It is inadvisable to attempt to override the autopilot, as [redacted] and will likely [redacted] the Earth.

Landing Stages

There are three stages to the landing sequence: In Space; Re-Entry; and In Atmosphere. The stages are written on the left of the altitude meter.

Altitude Meter

The Altitude meter shows the current altitude of the ship above the Earth's surface. Some landing activities must occur at certain altitudes.

The Altitude Meter has the transition points between the Landing Stages clearly marked.

In case of Landing Sequence Malfunction

In the unlikely event of a Landing Sequence malfunction, the pilot will have to manually perform several maneuvers in each stage to land safely. Yellow progress indicators will appear in the craft's status display if this occurs.

DO NOT attempt to perform these maneuvers if the Landing Sequence is working correctly.

Stage 1: In Space

There are three sequences that must be entered in the first landing stage. They must be entered in order, but are not time-sensitive.

1. Plot Course

    In  , set  to low

    Turn  on

    Press  and confirm

2. Collapse Orbit

Turn  and  off

Set  to 

Press  and confirm

3. Activate Heat Shields

Press  and confirm

Stage 2: Re-Entry

During Re-Entry, no sequences need to be entered.

Stage 3: In Atmosphere

While In Atmosphere, there are three sequences that must be entered in the specified order. Once all three sequences have been entered, the craft will land successfully. If these sequences are not entered before the craft hits the ground, it will crash.

1. Fire Retro-Thrusters

Set all  to high

Turn on

Set  to 

Press  and confirm

2. Deploy Flaps

Set all  to medium

Set  to 

Press  and confirm

3. Lower Landing Gear

Turn all switches on

Set  to 

Press  and confirm
